PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines
November, 1972

4. Number Of Dwelling Units, Occupied And Unoccupied, By Period Of Construction, Type Of Building, Construction Materials Used Urban And Rural: 1970	486
5. Number Of Households in Occupied Dwelling Units, By Type Of Building, Number Of Households Per Dwelling Unit, Urban And Rural: 1970	492
6. Number Of Households And Household Members In Occupied Dwelling Units, By Type Of Building, Occupancy, Urban And Rural: 1970	493
7. Number Of Occupied Dwelling Units, By Type Of Building, Number Of Rooms And Occupants, Urban And Rural: 1970	495
8. Number Of Dwelling Units, Occupied And Unoccupied, Number Of Households And Household Members, Family Nuclei, By Type Of Building, Urban And Rural: 1970	499
9. Number Of Households In Occupied Dwelling Units With Or Without Radio, TV Set Or Refrigerator, Urban And Rural, By Municipality: 1970	499
10. Number Of Households In Occupied Dwelling Units By Type Of Building, Type Of Lighting Used, Urban And Rural: 1970	500
11. Number Of Households In Occupied Dwelling Units By Type Of Lighting Used, Urban And Rural, By Municipality: 1970	502
12. Number Of Households In Occupied Dwelling Units By Type Of Building, Type Of Water Supply Used, Urban And Rural: 1970	503
13. Number Of Households In Occupied Dwelling Units By Type Of Water Supply Used, Urban And Rural, By Municipality: 1970	505
14. Number Of Households In Occupied Dwelling Units By Type Of Cooking Fuel Used, Urban And Rural, By Municipality: 1970	507
15. Number Of Households In Occupied Dwelling Units By Type Of Toilet Facilities Used, Urban And Rural, By Municipality: 1970	508

EXPLANATORY TEXT

Part I — POPULATION

INTRODUCTION

The 1970 Census of Population taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employees, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of constantly referring to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970 as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of

Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Assistance on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission, Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular Bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the Bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-in-charge who supervised the field operations, assisted by well-trained central office personnel. For the entire country, there were 2,297 public school principal teachers designated to act as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-Chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

EXPLANATORY TEXT

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion, place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for ever-married women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

This provincial report is presented in four (4) parts and comprises fifty-nine (59) tables, as follows:

	No. of Tables
Number of inhabitants	6
Economic characteristics	20
Social characteristics	19
Marital status	3
Education and literacy	7
Citizenship	2
Mother tongue	3
Ability to speak Pilipino, English and Spanish	2
Religion	2
Demographic characteristics	14
Fertility	8
Migration	6

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same.

EXPLANATORY TEXT

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	Table No.	Coverage	Size of sample (percent)
I. Number of Inhabitants	1-5	Household and institutional population	100
	6	Household population	5
		Institutional population	100
II. Economic characteristics	1-20	Household population	5
III. Social characteristics			
A. Marital status	1-2	Household and institutional population	100
	3	Household population	100
B. Education and Literacy	4-5	Household population	5
		Institutional population	100
	6-10	Household and institutional population	100
C. Others	11-15	Household and institutional population	100
	16-19	Household population	5
		Institutional population	100
IV. Demographic characteristics			
A. Fertility	1-8	Household population	5
B. Migration	9-14	Household population	5

EXPLANATORY TEXT

On the other hand, the items of data collected and percent of the population for which these items were asked are indicated below:

POPULATION ITEMS OF DATA COLLECTED

Item number	Item	Items collected for 100 percent of the household population	Items collected for 5 percent of the household population	Items collected for 100 percent of the institutional population
P 2	Relationship to head of household	x	—	x
P 3	Sex	x	—	x
P 4	Age at last birthday	x	—	x
P 5	Marital Status	x	—	x

P 33	Number of children born alive	—	x	—
P 34	Number of children now living	—	x	—

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- I. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- II. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

EXPLANATORY TEXT

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 1. on vacation;
 2. on business;
 3. schooling below college level;
 4. confined in a hospital, if confinement is not more than six months;
 5. in the Armed Forces, if their absence is not more than six months;
 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- e. Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the **conjugal** family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. **Single** — denotes a person who has never been married.
- b. **Married** — denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. **Widowed** — denotes a married person whose spouse died and up to the census taking has not remarried.
- d. **Separated** — denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. **Divorced** — denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pangasinan and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking, beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

EXPLANATORY TEXT

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born, whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertise in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either

- (a) working for pay or for profit or without pay in the family farm or enterprise, or
- (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others

HOUSEKEEPER

A housekeeper is a person who does housekeeping chores in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

(1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.

(2) The class of worker information refers to the same job described in the occupation and industry columns. The classification by class of worker consists of the following categories:

1. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - b) Government employee—working for government or government owned or controlled corporations.
2. Own business
 - (a) Self-employed—working in one's business, farm, profession, or trade for profit or fee, without paid employees.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employees.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPLANATORY TEXT

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II — HOUSING

INTRODUCTION

The **Census of Housing** was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The **Census of Housing** is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

Item No.	A. Characteristics of building
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
	B. Characteristics of dwelling unit
6	Number of rooms
7	Number of households and persons occupying dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
12	Type of cooking fuel
13	Type of lighting
14	Source of drinking water
15	Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

EXPLANATORY TEXT

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

1. Single house—a complete structure intended for a single family or household.
2. Duplex—a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
3. Apartment or accesoric—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesoria is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
4. Barong-Barong—a shack or makeshift shelter, usually built with light materials.
5. Commercial—a building used for trade and commerce such as a store or an office building.
6. Industrial—a building used for processing or manufacturing, such as a factory plant.
7. Agricultural—any structure used for agriculture purposes, such as barn, warehouse, etc.
8. Institutional—a hospital, school, church, etc.
9. Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or private residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

1. Galvanized iron, including aluminum and fiberglass
2. Asbestos
3. Concrete, tile
4. Cogon
5. Nipa, anahaw, buri
6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wall are:

1. Concrete, including hollow blocks, adobe stone, bricks, etc.
2. Galvanized iron, including aluminum
3. Wood, including plywood
4. Bamboo, including sawali
5. Nipa, anahaw, buri
6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

EXPLANATORY TEXT

TYPE OF TENURE

The type of tenure may be any of the following:

1. Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
2. Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
6. Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
7. Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SET

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—liquid form
3. Gas (liquefied petroleum)—piped or in cylinder (Esso Gasul, Rockgas, Shellane, Manila Gas, etc.)
4. Wood, including sawdust
5. Charcoal
6. Others—any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The type of lighting are:

1. Electricity—from whatever source of power unit
2. Kerosene (gaas)—whatever the nature of lamp used
3. Oil—any kind of vegetable (animal) oil other than kerosene
4. Others—any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

1. Piped water system (Municipal, NAWASA)
2. Artesian well
3. Pump
4. Open well
5. Spring
6. Rain water
7. Lake, river, stream, etc

TYPE OF TOILET FACILITIES

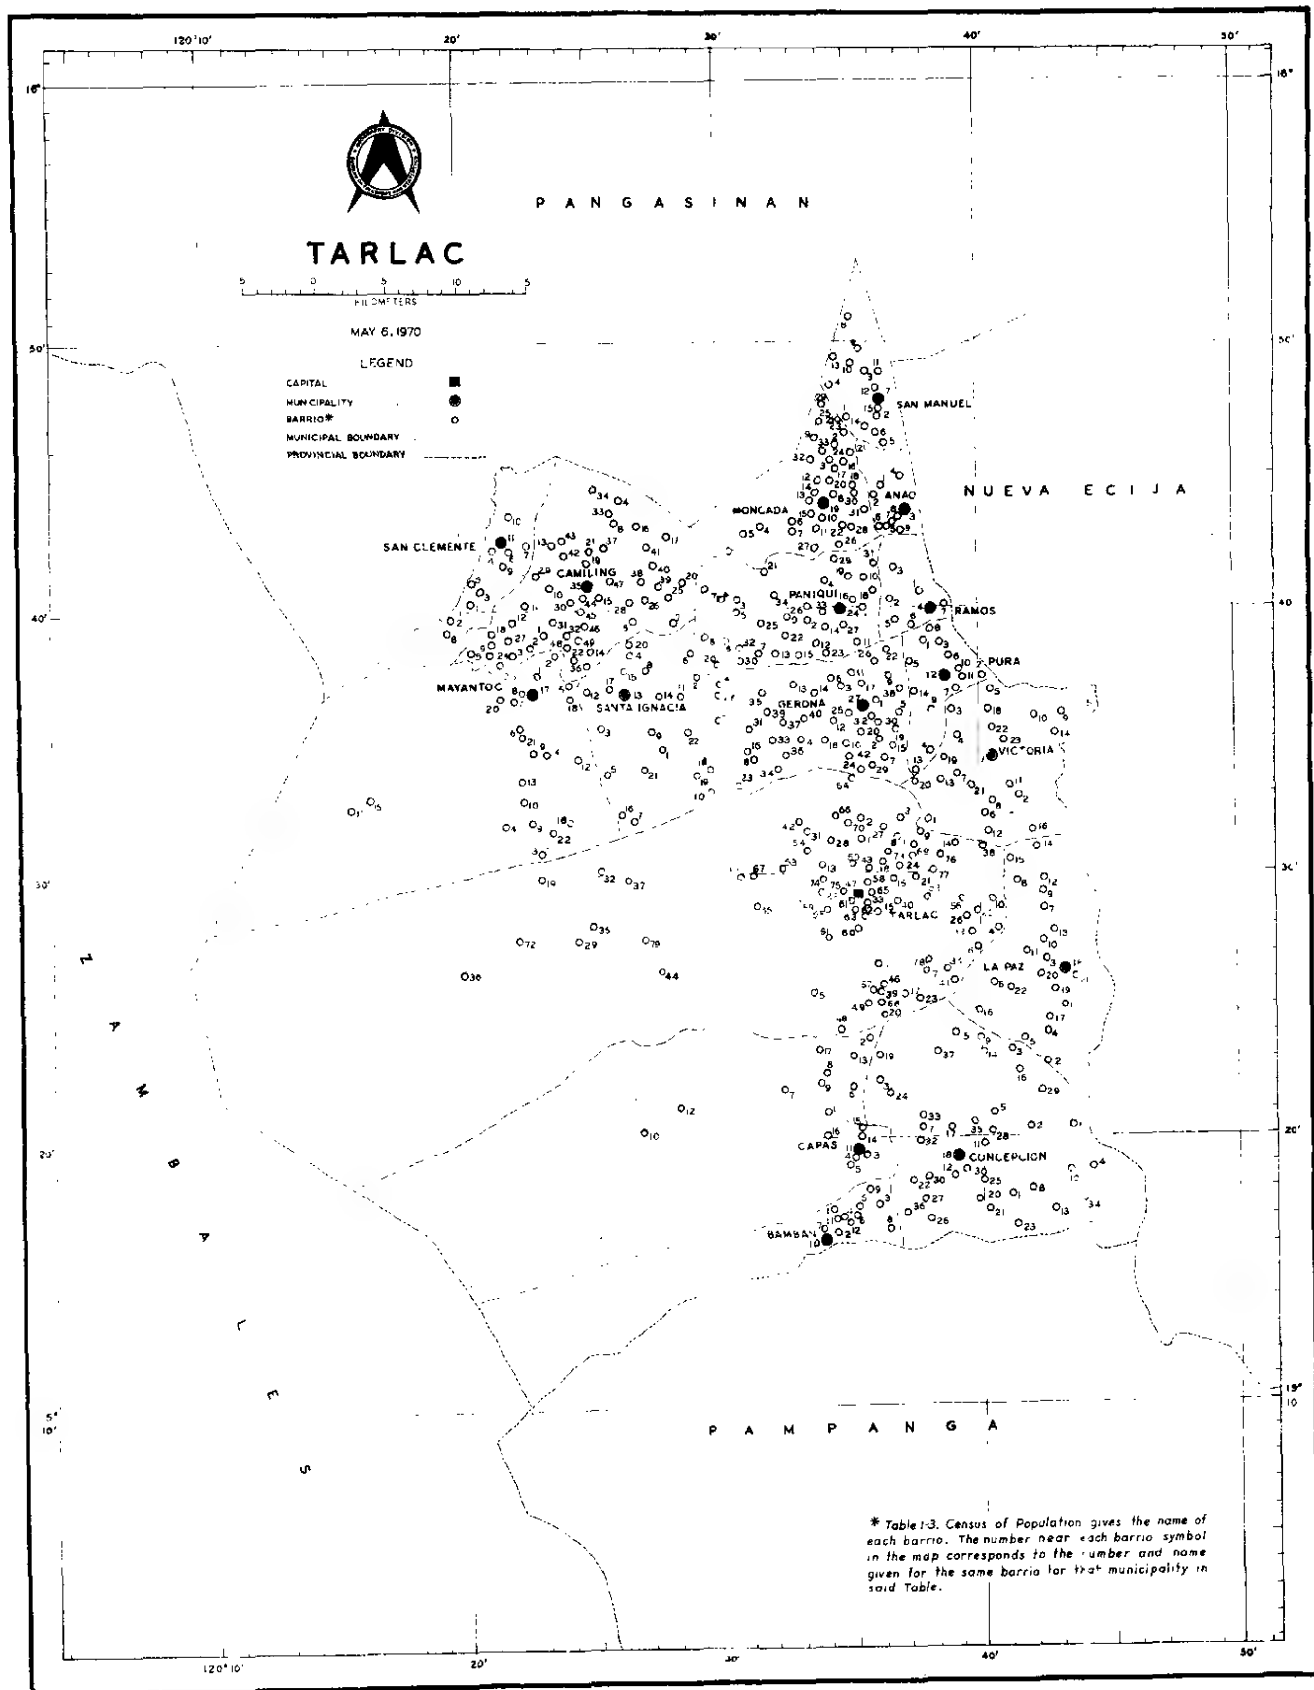

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

1. Flush system/water-sealed—Water-sealed toilet is that type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals its bottom from the pipe leading to the depository. In effect, the flush toilet is one type of water-sealed toilet.

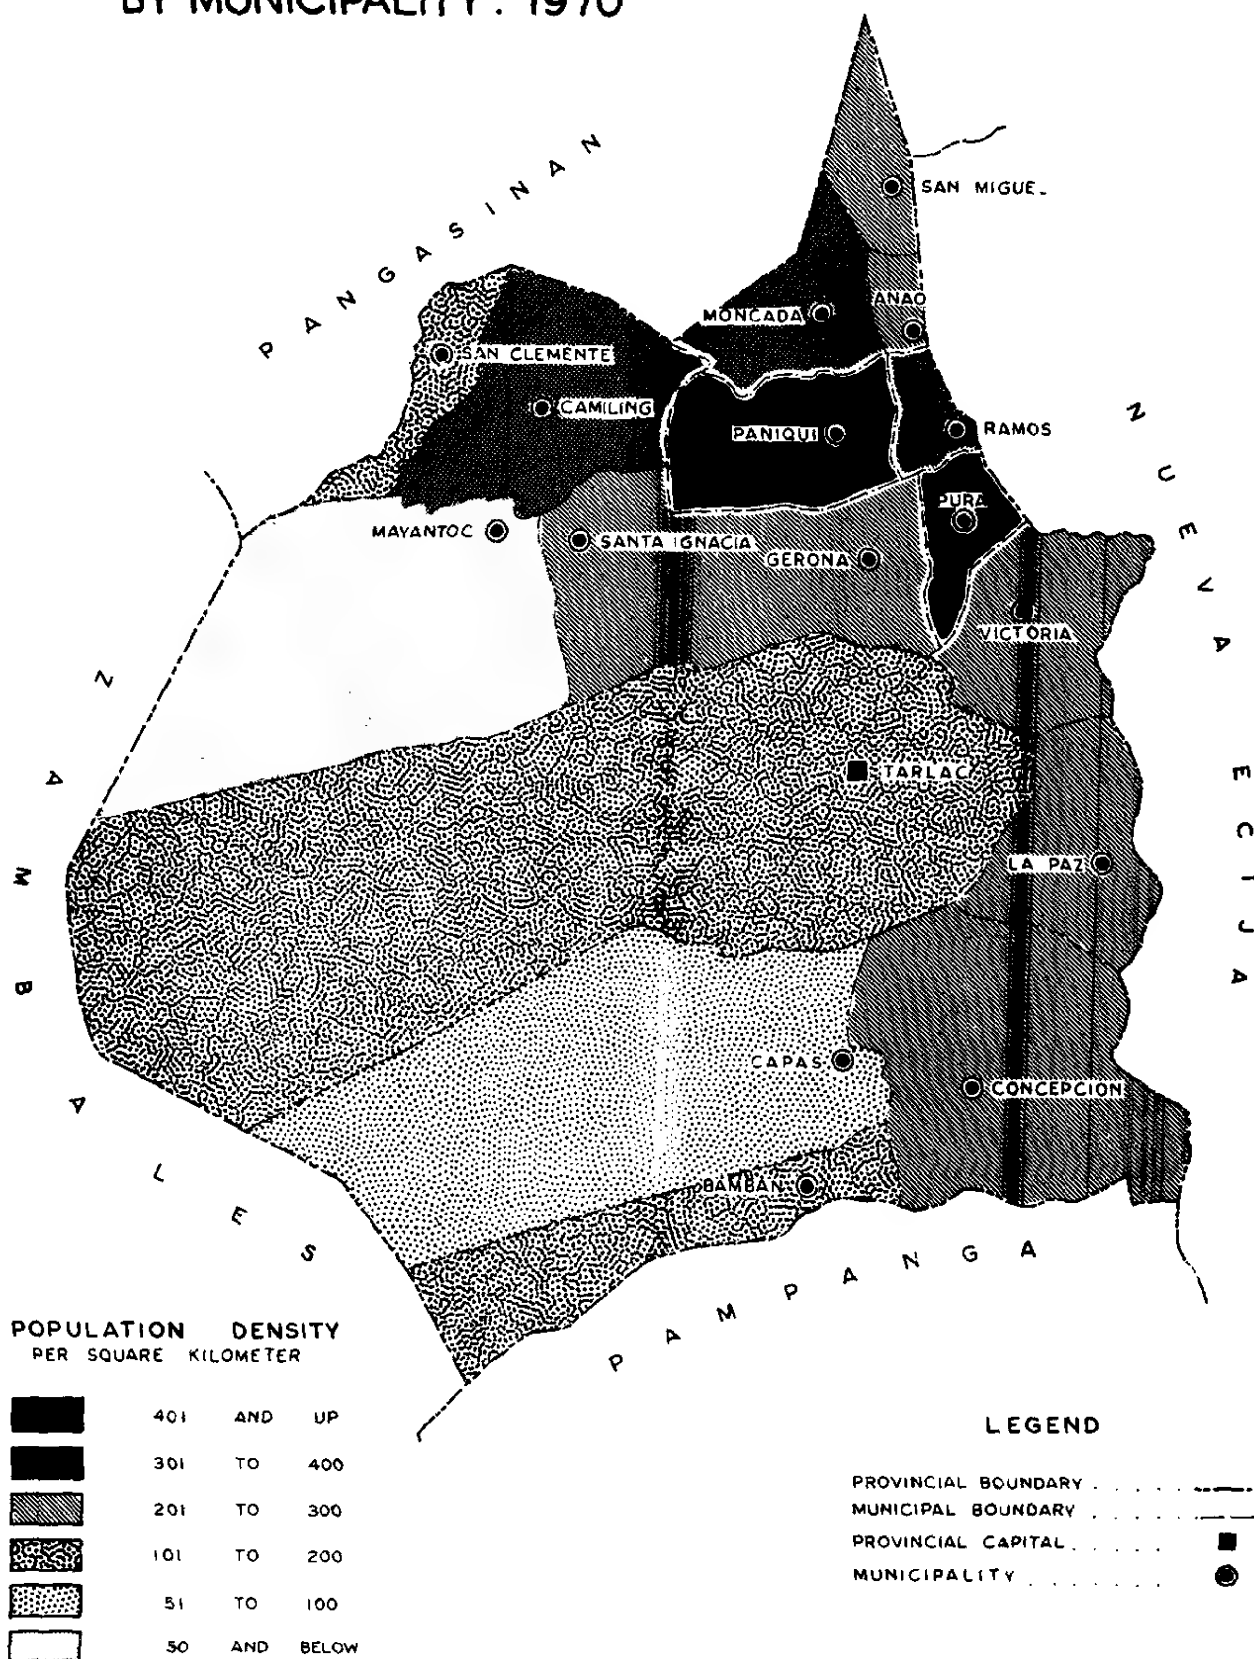

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits.

2. Antipolo system or closed pit—is a type of toilet wherein water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
3. Open pit system—is a pit which is entirely open or partly covered.
4. Public toilet—is any type of toilet for communal use.

POPULATION DENSITY MAP OF THE PROVINCE OF TARLAC BY MUNICIPALITY: 1970

TARLAC

INTRODUCTION

Tarlac, often dubbed the "melting pot of Luzon", is a landlocked province located in the northwestern part of the Central Plains of Luzon. It is bounded on the north by Pangasinan, on the east by Nueva Ecija, on the south by Pampanga, and on the west by Zambales. The northern, eastern and southeastern sections of the province consist of extensive plains, while the western and northwestern sections are made up of hills and mountains comprising the eastern side of the Zambales mountain range.

The last Central Luzon province to be organized under the Spanish regime, Tarlac originally formed part of Pampanga and Pangasinan. Organized in 1872, the province had for its nucleus the municipalities of Bamban, Capas, Conception, Floridablanca, Mabalacat, Magalang, Porac, Tarlac and Victoria. A year later, Camiling, Gerona and Paniqui were transferred from Pangasinan while Floridablanca, Mabalacat, Magalang and Porac were returned to Pampanga. Seventeen (17) municipalities presently comprise the province, with the municipality of Tarlac as the capital.

LAND AREA AND POPULATION

The province has a land area of 3,054.4 square kilometers and a population of 559,708, of which 99.8 percent are native born (Table 1-6). Its land area is 1.0 percent of the total Philippine area, and its population, 1.5 percent of the entire country's population. Ranking twenty-fifth in population size in 1960, with a population of 426,647, Tarlac went up to twenty-third position in 1970. There are about as many males as there are females in the province, the sex ratio being almost one-to-one. For every 100 females there are approximately 100 males (Table 1-4). During the preceding census, the males slightly outnumbered the females by about 2,287. In 1970 the latter has a slight edge over the former by only 656. Its density of 139.7 in 1960 rose to 183.3 in 1970, or an increase of 43.6 persons per square kilometers, exceeding the national density of 122.3 by 61.0.

The population of Tarlac grew at a slower rate than that of the Philippines. While the country grew annually at the rate of 3.01 percent, the province grew at the rate of 2.69 percent. From 1960 to 1970, the population of the Philippines increased by 35.4 percent; that of Tarlac, by 31.2 percent. It occupies the thirty-first position among the provinces in the population growth rate of the country between 1960 and 1970.

URBA-RURAL RESIDENCE

Predominantly a rural province, Tarlac has a greater percentage of its population still living in the rural areas (83.3%), with only 16.7 percent residing in urban areas. The extent of urbanization for the whole Philippines is 31.8 percent. More males (50.2%) than females (49.8%) comprise the rural population. However, the reverse is true for the urban population of which 51.5 percent are females and only 48.5 percent are males (Table 1-4).

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

An aggregate of 92,055 households and 98,988 conjugal family nuclei are reported for the province (Table 1-3). Each household has an average of 6.1 persons and each family nucleus, of 5.7 persons.

AGE COMPOSITION

Tarlac has a slightly higher proportion of the youth population than the entire country. Of its total population, 46.1 percent belong to the age group 0-14, while the Philippines has 43.1 percent of its population in the same age bracket. The province, however, has a lower proportion in the productive ages (15-64 years) and the older age group (65 and over), than the latter. While 50.7 percent of the Tarlac populace are in age group

15-64 and 3.2 percent in age group 65 and over, the Philippines has 53.4 percent and 3.5 percent, respectively (Table 1-4). The median age of the provincial population is 15.6 years, which is 1.8 years lower than that of the country.

In the rural areas, the population is slightly younger than in the urban areas; 46.9 percent of the rural population belong to the 0-14 age group, while only 42.0 percent of the urban population are found in the same age group. Correspondingly, the urban areas have a higher percentage (54.2%) in the productive ages than the rural areas (50.1%). A similar pattern is seen for the older age group where 3.8 percent of the urban population are 65 years of age and over, compared to its rural counterpart where only 3.0 percent belong to this age group. On account of its young population, the province has a high dependency ratio. While the dependency ratio for the Philippines is 87, that for Tarlac is 97. There are 97 "dependents" in the province for every 100 persons in the working ages (15-64) (Table 1-4). The dependency ratio is much higher in the rural areas (100), but lower in the urban areas (85) than that for the whole country.

ECONOMICALLY ACTIVE POPULATION

More than two-thirds, or 68.4 percent of the total population are ten years of age and over. Of the 383,120 persons belonging to this age bracket, 162,786 or 42.5 percent are economically active. More than nine-tenths, or 90.8 percent of those falling under this category are employed, with the unemployed comprising less than a tenth or 9.2 percent. A small percentage (4.9%) are looking for work for the first time. Of the 219,003 persons ten years old and over considered not economically active, the housekeepers make up 51.0 percent; the students, 13.2 percent; and "others", 35.8 percent (Table 11-1).

CLASS OF WORKER

The province has a total of 154,790 experienced workers, 43.8 percent of which are wage and salary workers. About 40.0 percent work in their own business, and 15.6 percent are unpaid family workers. More than eight-tenths, or 82.0 percent of the wage and salary workers are employed by the private sector, while the government sector has the remaining 18.0 percent (Table 11-3).

INDUSTRY

Tarlac is basically an agricultural province with more than half, or 51.2 percent of the total experienced workers engaged in agriculture, hunting, forestry and fishing. About 16.1 percent are in services; 10.4 percent in manufacturing; and 8.5 percent in commerce (Table 11-6).

Majority of those engaged in agriculture are males. Of the 79,263 persons actively engaged in this industry, 69,268, or 87.4 percent are males. Of the total economically active male population nearly three-fifths or 58.9 percent, are working in agriculture while more than one-fifth, or 22.1 percent, of the total economically active female population are working in the same industrial sector (Table 11-1).

OCCUPATION

Of the various occupations, 51.0 percent are farmers, hunters, loggers and fishermen; 14.4 percent, craftsmen, production process workers and laborers; 8.3 percent, sales workers; 7.2 percent, service workers; 5.9 percent, workers in transport; and 5.4 percent, professional, technical and related workers. The rest (7.8%) are either stevedores, clerks, administrative workers or miners (Table 11-12).

NUMBER OF HOURS WORKED

Most of the employed workers (51.3%) in the province worked for 45 hours and over during the reference period, while 31.6 percent worked for 35 to 44 hours. Only 7.1 percent worked for 25 to 44 hours and 6.7 percent, for 15 to 24 hours. A small percentage (2.4%) worked for less than 15 hours (Table II-15).

USUAL OCCUPATION

By usual occupation for the last twelve months, the farmers, hunters, fishermen and loggers comprise more than half, or 52.3 percent of the economically active populace, followed by the craftsmen with 13.9 percent; the sales workers, 7.2 percent; the service workers, another 7.2 percent; the professional, technical and related workers, 6.1 percent; and the workers in transport, 5.5 percent. The other occupation groups made up 7.6 percent (Table II-19).

MARITAL STATUS

Out of 379,858 persons aged 10 and over, 48.3 percent are single, 47.1 percent are married, 4.1 percent are widowed, and a very small percentage (0.4%) either divorced or separated (Table III-1). More males are single (50.8%), compared to those who are married, which constitute only 46.8 percent. The reverse is true among the females; those who are married make up 47.5 percent, while the "never married" make up only 45.9 percent.

LITERACY AND EDUCATION

The province has a high literacy rate. Of the population 6 years old and over, 80.3 percent are literate or "know how to read and write." The literacy rate is even higher in the urban areas with 86.5 percent, but a little lower in the rural areas with 79.0 percent, than for the province as a whole (Table III-4).

Majority of the population 25 years of age and over have not gone beyond the elementary grades. Of the 190,823 persons falling under this age bracket, 120,857, or 63.3 percent, have completed elementary education. Only 15.0 percent have finished high school education and 7.7 percent, while 13.6 percent have not had any formal schooling at all (Table III-6).

More than two-thirds or 69.4 percent of the population 6 years and over are not attending school, with less than a third or 30.6 percent attending school. In the 6-24 year age group, 52.3 percent are attending school. Of those attending school in this age group, 51.0 percent are males and 49.0 percent are females (Table III-9).

HOLDERS OF COLLEGE DEGREE

Reported as having college degrees are 13,422 persons, more than half (54.5%) of which are in the field of education. About 18.1 percent are in the Social Sciences, under which Commerce is classified, followed by the Medical Sciences with 7.6 percent; Engineering, 5.7 percent; Law, 2.8 percent; the Humanities, 2.5 percent; and Agriculture, also 2.5 percent. Only 0.8 percent are in Fine Arts, and 0.4 percent in the Natural Sciences, while 5.1 percent are holders of unspecified degrees (Table III-10). Majority of the female professionals in Tarlac (70.9%) are holders of BSE and BSEd degrees, with only 12.4 percent in the Social Sciences, and 9.2 percent in the Medical Sciences. Among the male professionals, however, only 34.1 percent are in Education. About 25.1 percent are in the Social Sciences, and 12.0 percent, in Engineering.

DIALECT

Two principal dialects are spoken in the province: Iloco and Pampango. Of the total population, 281,641 persons, or 50.3 percent, speak Iloco, which 232,007, or 41.5 percent, speak Pampango. Tagalog is spoken by about 5.4 percent and Pangasinan, by 2.0 percent (Table III-13).

More than two-thirds (67.5%) of the population can speak Pilipino, whereas only 47.5 percent can speak English, and 2.1 percent, Spanish (Table III-16).

RELIGION

The Roman Catholic far outnumber all the other religious groups in the province put together, with a following of 438,464 or 78.3 percent of the population, followed by the Aglipayans, with 67,999 or 12.2 percent; the Iglesia ni Cristo, with 20,914 or 3.7 percent; and the Protestants with 15,170 or 2.7 percent. Another 2.7 percent have other religious beliefs (Table III-19).

FERTILITY

The average number of children born alive to the ever-married women in Tarlac who have reached the end of their child-bearing period (50 years and over) is 5.8. The average number is higher (6.1) in the rural areas than in the urban areas, which is only 4.9. About 5.6 percent of the ever-married women aged 50 and over have never borne children by the end of their reproductive life.

An average of 4.7 children are born to every woman in the province who has already borne at least one child. For ever-married women in the rural areas, the average number is 4.8, compared to those in the urban areas, which is only 4.2 (Table IV-1).

Early marriages are quite common in Tarlac; 57.1 percent of the 112,716 ever-married women were married by the age of 20, and 88.1 percent, by age 25 (Table IV-7).

MIGRATION

A total of 480,886 persons or 85.9 percent of the population are residents of the same municipality, in which they were born, while 5.8 percent were born in other municipalities in the same province, and 8.0 percent were born in other provinces (Table IV-9).

More than nine-tenths (92.2%) of the 383,507 persons ten years of age and over, are residing in the same municipality of which they were residents in 1960, while 3.2 percent were residing in other municipalities within the province of Tarlac, and 4.4 percent were residing in other provinces (Table IV-11).

NUMBER OF DWELLING UNITS

The dwelling units of the province in both urban and rural areas total 91,939. Most of these are occupied (98.8%) and only 1.2 percent are unoccupied (Table 1). There are 87,749 or 95.5 percent of the total number of dwelling units that are single houses; 1,395 or 1.5 percent, duplex structures; 1,333 or 1.5 percent, "barong-barong"; 864 or 0.9 percent apartments/accessories; and 563 or 0.6 percent commercial buildings.

More dwelling units are found in the rural than in the urban areas. The dwelling units in the urban areas number 14,843 or 16.1 percent of the total number of dwelling units while the dwelling units in the rural areas number 77,096 or 83.9 percent.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

More than fifty-four thousand dwelling units or 58.8 percent of the total number of dwelling units are found in structures with roof of strong materials (aluminum, galvanized iron, asbestos, tile or concrete); 37,612 or 40.9 percent are found in structures with roof made of light materials that is, of nipa and cogon (Table 2).

Of the urban dwelling units, 11,630 or 78.4 percent, are built with roof made of strong materials and 3,193 or 21.5 percent, built with roof made of light materials. Of the rural dwelling units, 42,463 or 55.1 percent are built with roof made of strong materials, and 34,419 or 44.6 percent, with roof made of light materials.

With regard to the construction materials of the wall, 49.0 percent, of the total number of dwelling units are built with strong materials and 48.2 percent, with light materials (Table 2). In the urban areas, 70.4 percent are built with walls made of strong materials and only 27.5 percent, with light materials. More structures in the rural areas (52.1%) are built with light materials than those built with strong materials (44.9%).

TYPE OF TENURE

The total number of occupied dwelling units in the province is 90,815. Of these, the owner-occupied dwelling units (including owned and a part rented out, and owned and a part occupied free by others) constitute 95.9 percent; the rented only, rented and part rented out, and rented and part occupied free comprise only 2.2 percent; and the occupied rent-free, 1.8 percent (Table 3).

Most of the dwelling units in both the rural (97.6%) and urban (87.3%) areas are owner-occupied only, owned and a part rented out, and owned and a part occupied free by others. The rented dwelling units, are greater in the urban (9.4%) than in the rural (0.9%) areas.

TYPE OF CONSTRUCTION

Of the structures containing dwelling units, 44.6 percent were built during 1965-1970; 36.2 percent, during 1955-1964; and 14.1 percent, during 1945-1954. Only 1.4 percent were constructed during 1942-1944 and 3.7 percent, before World War II (Table 4).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

Majority of the occupied dwelling units contain one household (97.4%); only 2.2 percent are occupied by two households. There is a very slight difference between the number of dwelling units containing only one household in the urban (95.6%) and in the rural (97.8%) areas. Dwelling units occupied by two households constitute 3.6 percent in the urban areas and 1.9 percent in the rural areas (Table 5).

NUMBER OF ROOMS

With respect to the number of rooms, 25.9 percent of the dwelling units have only one room; 30.5 percent, 2 rooms; 24.4 percent, 3 rooms; 11.4 percent, 4 rooms; 4.4 percent, 5 rooms; and 2.0 percent, 6 rooms; Less than one (0.8%) have 7 rooms and 0.6 percent, 8 or more (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Of the 92,055 total number of households, 62.7 percent have radios, 3.5 percent have television sets, and 3.0 percent have refrigerators (Table 9). Out of the 14,844 households in the urban areas, 71.1 percent have radios, 11.4 percent have television sets, and 10.2 percent have refrigerators. In comparison 61.1 percent of the 77,211 households in the rural areas have radios, 2.0 percent have television sets, and 1.6 percent have refrigerators.

LIGHTING FACILITIES

Kerosene is the most common type of lighting used in the province; 76.5 percent of the total number of households use it (Table 11). Few of the households (22.8%) use electricity. A greater number of urban households (15.3%). Kerosene is used by 84.0 percent of the households in the rural areas and 37.8 percent in the urban areas.

WATER SUPPLY

The pump is the source of water supply of almost all the households (83.7%). Other households use the artesian well, 7.1 percent; piped water, 6.0 percent; the open well, 2.6 percent; spring, 0.3 percent; rain water 0.1 percent; and lake, river or stream, 0.2 percent (Table 13). More of the households in the rural areas (87.4%) use the pump than those in the urban areas (64.9%). Twenty-five percent of the urban households use piped water; 8.8 percent use the artesian well; 0.4 percent use the open well, 0.4 percent, spring; and 0.5 percent, lake, river, or stream. Less than one-tenth of the rural households (6.8%) use the artesian well; 2.9 percent the open well; and 2.4 percent, piped water. Very few households use spring (0.3%), rain water (0.1%) or water from lake, river and stream (0.2%).

COOKING FUEL

Wood is predominantly used as cooking fuel in Tarlac. Of the total households in the province, 80.2 percent use wood, 12.1 percent use kerosene, 5.8 percent use gas (liquefied petroleum), 0.8 percent use electricity, and only 0.1 percent use charcoal (Table 14). In the urban areas 59.1 percent use wood, compared to 84.3 percent in the rural areas. Kerosene is used by 20.2 percent of the households in the urban areas and by 10.5 percent in the rural areas. Gas (liquefied petroleum) is used by 15.6 percent of the urban households and by only 3.9 percent of the rural households.

TOILET FACILITIES

Of the total number of households 25.8 percent use the open pit, 22.3 percent use the antipolo or closed pit, 19.8 percent have the flush or water-sealed toilet, and 1.3 percent use the public toilets. Households having no toilet facilities constitute 30.8 percent (Table 15). In the urban areas 38.3 percent use the flush or water-sealed toilet, 33.4 percent use the antipolo or closed pit, 13.6 percent use the open pit, and 1.9 percent use the public toilets. In the rural areas 28.1 percent use the open pit, 20.2 percent use the antipolo or closed pit, 16.3 percent use the flush or water-sealed toilet, and 1.1 percent use the public toilets. Households having no toilet facilities in the urban areas comprise 12.8 percent, which is very much lower than that in the rural areas (34.3%).
